

In this issue of our Steel Moulding Catalog we have regrouped Related Materials to make for quickest selection. Other items remain classified strictly in accordance with their common Architectural uses although frequently other uses will be found.

NEW ITEMS: Attention is called to the many new items especially created for the issuance of this Catalog. Further included are the many more, introduced during the past several years, illustrated heretofore in Supplementary Folders. We mention but the most important and suggest a careful survey of the Catalog for others that may be of timely interest.

Pages 5 to 7: **Handrails in Steel, Architectural Bronze and Aluminum** in a greatly increased range.

Page 8: **Handrail Terminals** in Malleable Cast, Architectural Bronze and Aluminum.

Page 9: **Ball Finials and Urns** in Aluminum, also many new sizes in Iron and Brass.

Page 10: **Baluster Collars**, additional types and sizes in Iron and Polished Bronze.

Pages 31 to 33: **Door Saddles** in Steel, Architectural Bronze and Aluminum, a vastly larger variety of types and in sizes from 1 inch to 7½ inches.

Page 63: **Newel Caps and Drops** in Bronze; also new sizes in Steel.

Page 64: **Aluminum Flats and Squares**, a full range of sizes.

Additional New Items such as Aluminum Mouldings, Ornaments and Perforated Sheets are displayed in our other Catalogs to which reference is made on pages 69 to 71. If interested in them write for copies.

LEGEND OF SECTIONS: We have chosen three types of illustrations to distinguish the various metals. Your particular attention is called to these.

-  Rolled Steel
-  Architectural Bronze
-  Extruded Aluminum

GENERAL CONDITIONS: All items in this Catalog are normally carried in stock in our Warehouses. They are offered subject to prior sale.

Illustrations are actual size except as otherwise indicated.

Weights and measurements have been given as nearly correct as is possible, but are subject to the usual tolerances.

We guaranty our materials to be free from flaws and imperfections.

In case of defects, however, we shall replace the material free of cost. Our responsibility restricts itself to our material alone and not to labor, damages or other expenses incurred.

All transactions are subject to common trade practices and all contingencies beyond our control.

SPECIAL SHAPES: We have facilities to furnish **Special Shapes** particularly of **Intricate Nature** in Steel, Bronze or Aluminum. Our Mill Catalogs contain many thousands of Sections not shown here from which your Special Requirements may often be met. Where warranted New Tools to exact specifications can readily be produced.
