

COLD STAMPED (Light)

HOT FORGED (Heavy)

Reference: *Catalog 20 for Cold Stamped Ornaments; Catalog 18 for Hot Forged Ornaments.*

Our stock of Iron Ornaments approximates 3,000 numbers of widely varied designs, shapes and sizes and is, without doubt, the most comprehensive available. With such an enormous range, possibilities of design are limitless.

The appearance of our ornaments approaches the hand forged character in a remarkably true manner. Notwithstanding this, their low cost is surprising.

The use of Cold Stamped Ornaments is recommended largely for interior work, while the Hot Forged is of sufficient thickness for exterior application. Both kinds can readily be reshaped and reworked, cold or hot, and will take all Finishes.

Catalogs upon request.
